

Your IT environment for today and tomorrow.

## What you need to know about Windows® 8.

Dell and Microsoft work together to simplify your IT. Windows 8 is ready to give your business the tools you need to meet your workers' changing IT needs in a way that's reliable, productive and secure.

Windows 8 is designed to deliver what today's workforce wants, bringing new possibilities in mobile productivity, end-to-end security, virtualization and management advancements, and the business tablets you've been waiting for. Windows 8 is designed to deliver a fast, fluid, no-compromise experience for businesses; along with a user interface that responds equally well to touch as it does to a keyboard and mouse.

### Windows 8 has what you need:

- Manageable mobile productivity.**  
New features like Windows To Go give businesses new possibilities in mobile productivity. It's a fully manageable corporate Windows 8 desktop on a bootable USB stick. It can allow employees to work from anywhere on any device with a USB port, while also helping IT professionals keep their organizations secure.
- Dissolving business boundaries.**  
Enhancements with DirectAccess, Branch Cache and Mobile Broadband eliminate work boundaries while keeping employees secure.
- Security anywhere.**  
Windows 8 has end-to-end security, with features like Trusted Boot, BitLocker Drive Encryption and AppLocker, enabling a more secure foundation no matter where employees are located.
- Apps made simple.**  
Windows 8 makes it simple for businesses to use new apps to enhance worker productivity—and develop their own apps.
- Seamless integration across platforms.**  
Windows 8 tablets are designed to deliver both mobile convenience and user productivity by running all the Windows 7 line of business and productivity apps. Windows 8 gives businesses the ability to manage and secure apps across multiple devices.

# Windows® 8 experience.
